

Asad Ashraf

DevOps & cloud Engineer

Lahore, Pakistan | +92 304 4463268 | gasadmail@gmail.com | linkedin.com/in/asadkhan-dev | github.com/gitasadhub

PROFESSIONAL SUMMARY

Cloud & DevOps Engineer with hands-on experience managing production infrastructure, CI/CD automation, containerized applications, Linux servers, monitoring platforms, and cloud-native deployments. Experienced with AWS, Kubernetes, Docker, Jenkins, GitHub Actions, Prometheus, Grafana, PostgreSQL, and Bash scripting. Proven ability to automate deployments, improve operational reliability, and support production environments with minimal downtime.

PROFESSIONAL EXPERIENCE

DevOps & Site Reliability Engineer — IntelliCode Pvt

mar 2026 – Present | Lahore, Pakistan

- Managing production ERP infrastructure and deployment workflows for live business environments
- Building and maintaining CI/CD pipelines using Jenkins and GitHub Actions
- Deploying and managing Dockerized applications on Linux-based servers
- Working with Kubernetes deployments and cloud-native infrastructure on AWS EKS
- Managing reverse proxies, SSL certificates, DNS configurations, and application hosting
- Monitoring infrastructure health, deployments, and logs using Prometheus and Grafana
- Supporting backup automation and disaster recovery operations
- Troubleshooting production infrastructure, networking, and deployment issues
- Working with AWS services including EC2, ECR, EKS, IAM, and Load Balancers
- Collaborating with development teams on deployment automation and operational reliability
- Managing production deployments with minimal downtime and operational disruptions
- Assisting in infrastructure optimization, deployment standardization, and server maintenance

Backend Engineer — Techmantic Pro Inc

Dec 2025 – Apr 2026 | Lahore, Pakistan

- Designed and developed RESTful APIs using Node.js and Express.js for production web applications
- Managed PostgreSQL databases including schema design, query optimization, and migrations
- Integrated backend services with third-party APIs and external data sources
- Implemented JWT-based authentication and role-based access control (RBAC)
- Collaborated with frontend teams to define API contracts and ensure smooth integration
- Deployed and maintained backend services on Linux-based servers with Docker containerization
- Monitored application performance and resolved bottlenecks in production environments
- Wrote shell scripts for automation of routine backend maintenance and operational tasks
- Participated in code reviews and contributed to engineering best practices and documentation

DevOps Engineer Trainee — Corvit Systems

May 2025 – Aug 2025

- Developed CI/CD pipelines using Jenkins and GitHub Actions
- Worked with Docker, Kubernetes, Terraform, and cloud deployment practices
- Learned infrastructure automation across AWS and Azure environments
- Practiced monitoring, DevSecOps, and cloud-native deployment workflows
- Built deployment pipelines for containerized applications
- Worked on Linux administration and cloud infrastructure fundamentals

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, ECR, EKS, IAM, ALB), Microsoft Azure Fundamentals

DevOps & SRE: CI/CD Automation, Infrastructure Monitoring, Deployment Automation, Reliability Engineering

Containers & Orchestration: Docker, Docker Compose, Kubernetes, AWS EKS

CI/CD & Automation: Jenkins, GitHub Actions, Azure DevOps

Infrastructure & Systems: Linux Administration, Nginx, Reverse Proxy, SSL & DNS Configuration, Shell Scripting

Infrastructure as Code: Terraform (Basic)

Monitoring & Observability: Prometheus, Grafana, Alertmanager, Log Monitoring

PROJECTS

Production ERP Infrastructure & SRE Operations

Docker • Jenkins • Linux • PostgreSQL • Prometheus • Grafana • CI/CD

- Managed production deployments and CI/CD workflows using Jenkins and GitHub Actions
- Maintained Dockerized services and Linux-based application environments with high availability
- Monitored application uptime and operational health via Prometheus and Grafana dashboards
- Configured Nginx reverse proxy, SSL certificates, and service routing for production environments
- Troubleshoot production infrastructure, networking, and deployment issues under time-sensitive conditions
- Automated backup and operational maintenance workflows using Bash scripting

Infrastructure Monitoring & Log Management System

Prometheus • Grafana • Alertmanager • Linux • Docker

- Designed and configured infrastructure monitoring pipelines using Prometheus
- Built Grafana dashboards for real-time visibility of server and container metrics
- Set up Alertmanager rules for proactive incident detection and notification
- Monitored server resources, container health, and application availability across environments
- Reduced mean time to detection (MTTD) for production incidents through improved observability

Automated Backup & Disaster Recovery System

Linux • Bash • PostgreSQL • Cron

- Automated scheduled PostgreSQL database backups using Bash scripts and cron jobs
- Implemented backup retention policies and structured archive management
- Developed scripts for log rotation, cleanup automation, and operational maintenance
- Tested and documented recovery procedures to ensure RTO and RPO targets were met
- Improved backup consistency and disaster recovery readiness across production environments

EDUCATION

BS Computer Science2022 – 2026

Pak AIMS / Institute of Management Sciences

Intermediate in Computer Science2018 – 2021

Aspire College Township

CERTIFICATIONS

- Docker Certified Associate — Corvit Lahore (2025)
- Microsoft AZ-400 — Designing and Implementing DevOps Solutions
- Scaling Cloud-Native Applications with KEDA (LFEL1014)
- AWS Application Migration Service (AWS-MGN)

CORE COMPETENCIES

- Cloud Infrastructure Management
- CI/CD Automation
- Linux Server Administration
- Monitoring & Observability
- Production Operations & Troubleshooting
- Collaboration & teamwork
